Funded PCAP projects:

Dr. Divyanshu Mohananey

- 1. Study the natural history of isolated degenerative mitral stenosis
- 2. To study the various methods of quantification of severity (transmitral gradient, area by continuity equation, area by pressure half time, mitral dimensionless index, planimetered area) and their impact on clinical outcomes.
- 3. To study patients with severe AS who undergo a preprocedural planning retrosp**tive** gated CT in an effort to correlate CT derived mitral valve and mitral annular areas with echocardiographic parameters of valvular stenosis severity.

Dr. Nunzio Gaglianello & Dr. Leo Gozdecki

Dr. Anna Palatnik & Dr. Jacquelyn Kulinski:

Dr. Anna Palatnik, associate professor in Obstetrics and Gynecology, Division of Maternal Fetal Medicine, and Dr. Jacquelyn Kulinsk Associate Professor the department of Medicine, Division of Cardiovascular Medicine, were awarded PCAP funds for their project entitle $\dot{d} - \ddagger \cdot \cdot \cdot \uparrow \ddagger \cdot \cdot \uparrow \uparrow \cdot \cdot \uparrow f \cdot \dots - \check{Z} f$ " $\check{S} \ddagger f \check{Z} - \check{S} \acute{O}$

T " $\ddagger f - \bullet \ddagger \frac{1}{2} \frac{1}{2} + \frac{1}{2} \frac{1}$
