

BSL3) labs and Animal ABSL3) rooms

laboratories

rooms

[Molecular Biology and Disease Research's BSL3 and ABSL3 Facilities](#)

are core MCW facilities allowing manipulation and experiments requiring BSL3 and/or ABSL3 containment. This area covers approximately 10,000 square feet and includes dedicated BSL3 and ABSL3 containment labs, two of which are equipped for animal research. Individual BSL3 laboratories range in size from approximately 1,000 to 2,000 square feet and contain either one or two 6-ft class II-

animal rooms. Each ABSL3 animal room is equipped with one 6-ft class II-B1 bio-safety cabinet and can accommodate a rodent cage rack (Model: BCU-3000-30B), which can hold up to 12 cages.
