strongly recommends that all users access Brightspace Learning Environment with the latest version of a supported browser.

To improve the functionality of the Audivideo player in Brightspace Learning Environment, multi bitrate streaming, and search functionality are now available.

Multi-bitrate streaming allows highefinition videos to be played at standard definition to reduce the bandwidth necessary for users to watch videos.

The new search functionality allows users to locate key words in video captions and quickly navigate to those sections.

Released in Brightspace Platform March 2021/20.21.3 Release Notes, this release updates the date and time picker in Brightspace Learning Environment to include the following usability changes:

The button is renamed to Today. The Today button continues to set the date and the time based on the context. For example, choosing Today for an End Date sets the current date and sets the time to 11:59 PM.

Added a Now button that sets the current date and time. The Today and Now buttons only appear when a date and time are required. When only a date is required, only the Today button appears and functions the same as the Now button.

The Today, Now, and Clear buttons are ceratiegned in the date and time picker.

This release adds a link to the Content Reports page for courses using the new Content experience (Lessons). To access, open the settings menu by dicking the gear symbol next to +New Unit, and click View Reports.
